

## MASTER ALERT MA2602

The Master Alert® MA2602 Message Titler is a sophisticated ad on to any Cable TV System, available in NTSC and PAL. Messages are superimposed simultaneously on all TV channels in use, while the viewing of programs proceeds uninterrupted. The unit is tied directly into a riser or trunk line and, when activated, the emergency information titles all broadcast standard TV-carriers in use. Applications have been very common in apartment buildings, where a Character Generator is used as a companion product.

When the unit has been updated or an emergency arises the Master Alert is activated. The messages appear as a white overlay and crawl from right to left. Powerloss to the Message Titler does not interrupt the looped through TV-signals. Master Alert is a registered trademark of Master Video Inc. MVI is innovative, versatile and responsive to market needs with its research and engineering design program. This all adds up to "Technology at your Fingertips".

### SPECIFICATIONS:

MODEL: MA2602  
 INPUT FREQUENCY RESPONSE: DC to 800 MHz  
 THROUGHLOSS: max. 1 dB  
 INPUT AND OUTPUT IMPEDANCE: 75 ohm  
 RF-CONNECTORS: F  
 TV INPUT SIGNAL: NTSC standard 525 lines ( interlace ) or PAL standards  
 : 625 lines ( interlace )  
 SIGNALSTRENGTH: +15 dB/mV to +45 dB/mV  
 MEMORY: Eprom  
 DOT MATRIX: 10 x 16 dots  
 MESSAGES: two custom programmed messages of 2 lines each,  
 : 26 characters per line, 52 characters per message  
 1. MESSAGE: permanent display, activated by switch, reed relay or  
 : remote contact  
 2. MESSAGE: switch or remote contact activated in intervals by timer  
 MESSAGE INTERVAL: 7 min., 15 min., 30 min., 60 min. on board selectable  
 MESSAGE DURATION: 7 sec., 15 sec., 30 sec., 60 sec. on board selectable  
 SYSTEM TIMING: crystal controlled  
 ACTIVE DISPLAY: 32 usec.  
 MESSAGE CRAWL: adjustable  
 TEMPERATURE RANGE: room temperature  
 POWER: 117 VAC, 13 Watts (for Export 230 VAC)  
 ENCLOSURE: 19" x 1.75" x 5" rackmount
